Press Release

August 1, 2017

In 2017 Ace Manufacturing is proud to be celebrating our 50th Anniversary. Since 1967, Ace has become and **‘An Innovative Leader in Clutch Technology’** for both the heavy-duty and performance industries. In addition, we produce quality components parts for heavy duty clutch rebuilders. We are a family owned business employing more than 120 skilled workers in our Sullivan Missouri plant, and ship product throughout the USA and across the globe.

For our heavy-duty customers, we have a clutch for nearly every over-the-road tractor hauling in America today, and for many popular vehicles produced in other countries. With several patents of our own, Ace has improved on many original equipment components.

Ace Manufacturing is the only heavy-duty clutch manufacturer that produces its own friction material. The proprietary formulas are used on every line of clutch for tractors, heavy duty trucks, performance street cars, all the way to 9000 HP top fuel dragsters. Along with superior friction materials, Ace discs are also made with patented cryogenically processed springs that ensure durability and longevity.

Ace assures continual improvement in its operation by having ISO Quality and Environmental Systems in place for ISO 9001:2008 and ISOO 14001-2004.

Our Core Values

- Safe
- Dependable
- Customer Focused
- Aligned
- Great Teammate
